Sees Little Hope of Accord With Britain in Great Problems

Canadian Press
TORONTO, April 28.—The Indian National Congress, today, stood in

HAVE you noticed the British pound sterling "slipping" badly day after yesterday and again yesterday. And the British do not regret. According to the "Financial Times" of London, Great Britain would like the pound to fall, but not for the reasons which you might think.

The British have recently established a special emergency fund of one billion pounds, and fifty million pounds of this fund has been sold for \$20 million dollars. The British think that ought to know why the British are selling this money to buy American dollars. The pound slipping is not a disaster, they think, it is probable.

When a nation is selling its money to buy another kind of money, its own government is making a loss.

But when any nation is deeply in debt, it is wise to sell its money to make its money.

◆ HUMAN'S COPPER DIET EQUALS CENTS ◆

✓ JACKSON, Mich. April 28—Need of copper in the diet is becoming a household word. Many physicians here, who estimate an adult eats about the same amount of copper as a penny, are recommending a diet containing a cent's piece. of India, as minimizing efforts by the royalists to create a rift between the two groups, and in agreement with all parties in the League toward promotion of the cause of greater unity in the partnership of the British Commonwealth.

Lord Curzon, inaugurating the May 25 lectures, which are to bring an end to a British tour of the province from Great Britain, last night told an audience of 2,600 at the United States Hotel that the British Government is not prepared to make Mahatma Gandhi and his adherents any concessions that would make the life of Indian society difficult.

As long as the Indian National Congress is bent on the perpetration of its own claims, and is unwilling to make any concessions, the British Government will not be tempted by compromise or by abatement of its position, he said. "The British Government is not the enemy of others," he said, "there is little to be gained by the British Government or Britain or the moderate elements of India and Hindu thought that are outside the Congress."

He regarded as one of the major mistakes of the British Government the fact that "Party through temperance and the desire to please the Congress, has been the cause of the present circumstance. Mr. Gandhi has repeatedly demonstrated that he is not a man of his word, and that he is not a man who is willing to sacrifice his interests to the interests of his country."

The former viceroy will visit a number of cities in the United States for Great Britain, and has invited a number of Indian leaders to speak at other points in Canada.
